General Information

Project Summary

Assumption:

In future cooperative automated driving, road infra can play a key role in monitoring and support vehicle traffic for increased efficiency and safety

Objective:

- Provide automated vehicles management solutions based on I2V and V2V
 - interaction for urban signalized intersections & corridors

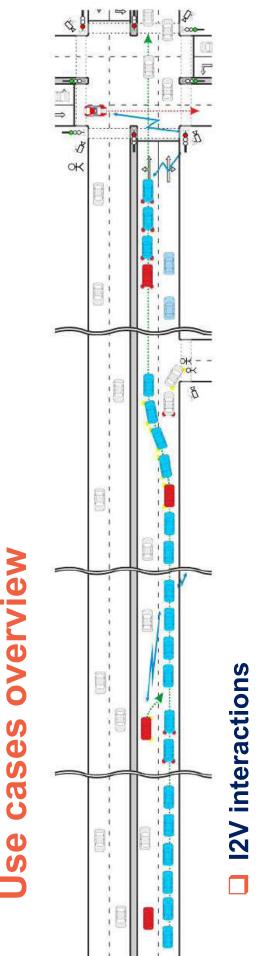

Approach:

- Create algorithms (at both infra and vehicle side) for optimally organizing the
 - automated traffic flow (e.g. I2V Negotiations, platooning)
- Develop suitable enabling technologies (e.g. Comms schemes)
 - Include conventional traffic and VRUs
- Test/prove via simulation and real-world prototype (ITS G5-based)

MAVEN is funded by the EC Horizon 2020 Research and Innovation Framework Programme, under Grant Agreement No. 690727

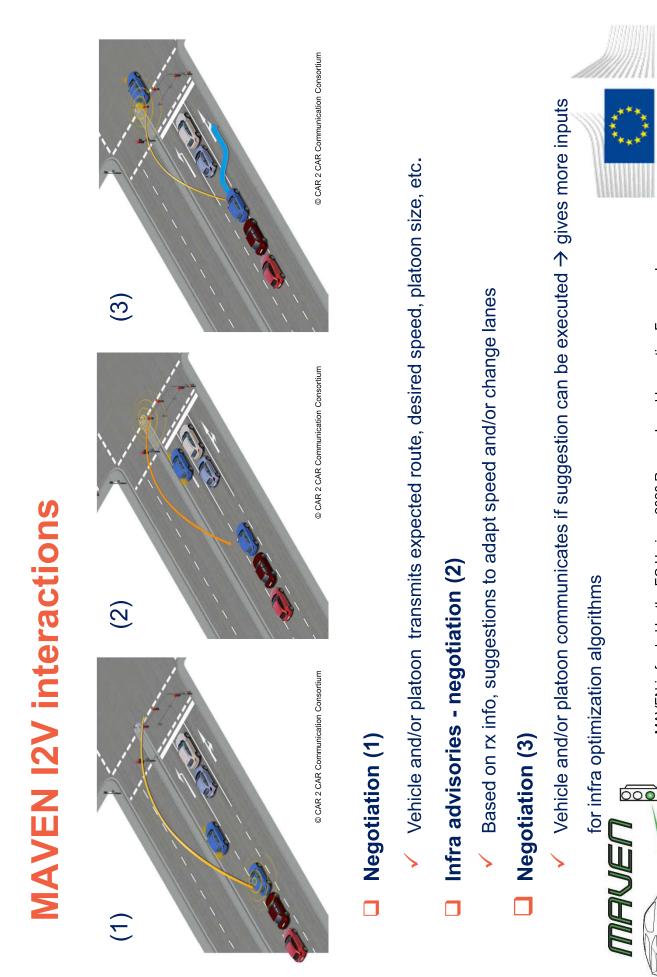

- Negotiation, speed change advisory, lane change advisory
- Traffic controllers optimization
- Signal optimization, priority management, queue estimation, green wave
- Platoon management
- Forming, joining, travelling in, leaving, breaking a platoon
- Conventional traffic and VRUs
- Detection of non-coop cars, VRUs, emergency situations

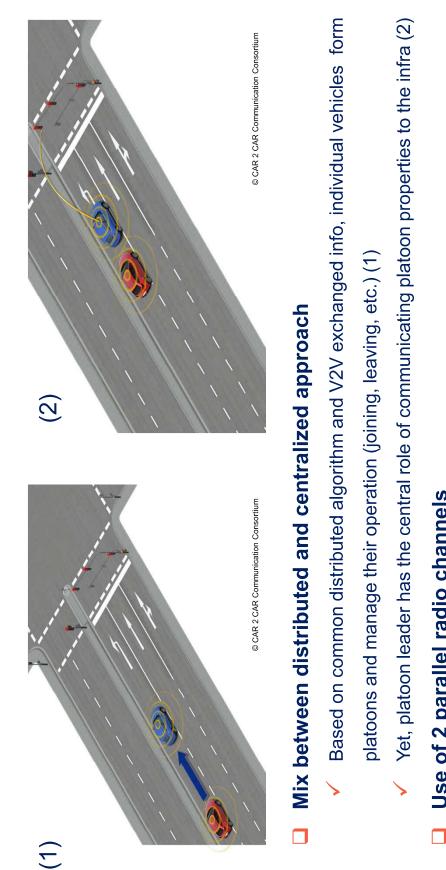

MAVEN is funded by the EC Horizon 2020 Research and Innovation Framework Programme, under Grant Agreement No. 690727

MAVEN is funded by the EC Horizon 2020 Research and Innovation Framework Programme, under Grant Agreement No. 690727

European Commission

MAVEN platooning

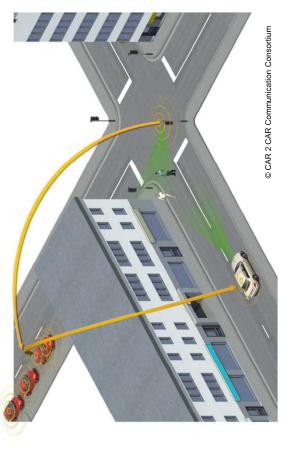

- Use of 2 parallel radio channels
- One for advertising vehicle and/or platoon characteristics to other vehicle or infra
- The other, to transport platoon control and management info

MAVEN is funded by the EC Horizon 2020 Research and Innovation Framework Programme, under Grant Agreement No. 690727

Use of cooperative sensing for improved detection and reaction

- Both vehicles and infra can detect and share info about non-cooperative road users
- Improved awareness used to adapt vehicle trajectory for ensuring increased safety

Management of emergency situations

Vehicles in platoon keep monitoring the environment and controlling the system all the time

to possibly undertake emergency (automated) reactions

MAVEN is funded by the EC Horizon 2020 Research and Innovation Framework Programme, under Grant Agreement No. 690727
